

The ₹5–10 Lakh Silent Revenue Leak Every Dental Practice Faces

Clinics invest heavily in Google Ads, Instagram & patient reputation, but 30% to 45% of high-intent patient acquisition breaks down completely at the front-desk phone line.

Peak-Hour Call Bottlenecks

When 2–3 patients call simultaneously while the receptionist is attending an in-clinic patient or billing, lines go busy or ring out. **67% of callers who hit a busy tone immediately call the next clinic on Google.**

38%

CALLS UNANSWERED DURING RUSH HOURS

The 7:00 PM – 10:00 AM Void

Over 40% of acute toothaches, crown dropouts, and emergency search queries happen late evenings, nights, and Sundays when the clinic is closed. Unanswered calls mean patients book with hospital emergency wards or competitors.

42%

INBOUND INTENT LOST AFTER HOURS

The 35% Patient No-Show Plague

Human receptionists book slots verbally without locking upfront commitment deposits. Casual patients fail to show up, leaving expensive doctor operatories and sterilized chairs idle at ₹3,000–₹8,000/hour in wasted clinic overhead.

₹2.5L+

MONTHLY OPERATORY LOSS PER CHAIR

Staff Churn & Operational Burnout

Front-desk turnover averages 4–8 months. Receptionists demand ₹18,000–₹25,000/month, require weeks of procedural training, take sick leaves, and give inconsistent, rushed answers when handling crowded waiting rooms.

₹3.2L/yr

COST PER HUMAN RECEPTIONIST SEAT

Meet Simran: Automating Your Front Desk at Scale With Zero Headache

An ultra-fast, culturally native voice agent speaking natural Hindi & Hinglish, booking calendar slots in real-time, and collecting ₹500 reservation fees before patients hang up.

Zero Busy Tones

Answers 10+ callers simultaneously in under 1 second. Every patient experiences warm, immediate hospitality.

Doctor Roster Routing

Understands symptom specialties (Dr. Ananya for RCT/implants; Dr. Rohit for braces). Enforces clinic hours & 8-day booking rules.

Automated Fee Gate

Directs callers to complete ₹500 booking fee via UPI/Cards on-screen, slashing costly patient no-shows to near 0%.

Operational Dimension	Traditional Human Receptionist	Simran AI Autonomous Voice Agent
Working Hours	8 hours / day (Mon-Sat only; off on Sundays)	24 Hours / 365 Days (Never sleeps, takes leaves or breaks)
Call Concurrency	1 call at a time (others get busy tone or drop)	Unlimited simultaneous calls handled in real-time
Response & Pick-up	4-6 rings or delayed if attending counter patient	Instant pickup (<1.0s latency) with zero wait
Booking Fee Collection	Reluctant to ask for money; books unconfirmed slots	100% disciplined ₹500 reservation gate via UPI/Card
Language & Tone	Mood-dependent, rushed during clinic rush hours	Always warm, polite, culturally respectful Hindi/Hinglish

Transparent, High-Yield Commercial Investment Plans

*Full Telephony Solution includes: Dedicated Indian Virtual Mobile Number (+91) + Plivo Telephony Trunk + Sarvam STT/TTS engine.

Just 1 Root Canal Treatment (₹15k) or 1 Implant (₹35k) recovered pays for the entire monthly plan!

Never Miss Another High-Value Patient. **Launch in 48 Hours.**

Zero staff disruption. Zero equipment purchases. We ingest your treatment fees, doctor roster, and calendar in 2 business days.

ZERO-RISK IMPLEMENTATION

• Plug & Play Integration

“While your competitors let evening calls go to voicemail, your clinic books the patient and collects the fee.”

Every morning your doctors walk in with a fully booked operatory schedule, prepaid reservation deposits, and organized patient charts directly synced to Google Calendar and your CRM.

Our 48-Hour Onboarding Promise:

1. **Clinic Discovery:** Ingest your doctor roster, pricing & working days.
2. **Number Setup:** Connect your dedicated virtual line or web widget.
3. **Live Testing:** Run simulated test calls to ensure clinical accuracy before launch.

14-Day Pilot Guarantee: Complete onboarding satisfaction or 100% money back.
